

HVAC | AI SEO Case Study

Goals

Enhance Keyword Performance

Increase Engagement and Visibility

20-40% Lead Generation (combo of both GBP calls + onsite conversions (forms/calls depending on the tracking setup))

Action Plan

1. Extensive keyword research to find relevant keywords including competitive analysis
2. Optimize GMB profile from top to bottom
3. Built relevant niche and local citations
4. Optimized onsite for location signals
5. Post weekly on their GMB profile to increase additional signals
6. Evaluate the site's content silo for content strategy
7. Create and publish monthly blogs as supplementary content for target keywords

We have used Ahrefs, a trusted third-party tool, to check a website's organic traffic performance. As seen, we have seen an increase in average organic traffic, average organic traffic value, and organic pages in April - July. In August, we saw a decline. This decline can be attributed to the recent August 2023 Core Update. To recover, we encourage updating pages with helpful content to improve the user experience on the website.
